

Read Me

APK:

A software build using React Native Framework on Expo environment and Yarn Package Manager. To maintain on air update Expo Application Service was used.

DEVICES AND SOFTWARE VERSIONS:

GOOGLE PIXEL 6 PRO (EMULATOR), ANDROID 12

IPHONE 12 (EMULATOR AND ON DEVICE), IOS17

On some other device it was also tested functionality Remains the same but sometime styling got messed up.

FEATURE:

- * Available for both device and ready to deploy.
- * On Air update available for both Play Store and App Store.
- * Consistency was maintained through development to match iOS and Android Design.

TECHNOLOGY

- * Redux for State Management (Synchronous).
- * Axios for asynchronous API calls.
- * React Navigation 6 for smooth Navigation.
- * Expo fonts and icons for Beautiful Design.
- * Splitting Code for code processing.
- * Modular Design for readability of Code.

NOTE

To get the proper idea of styling I would suggest to use Google Pixel 6 Pro or iPhone 12.
